

IMPROVED DATA ACCURACY WHEN DOCUMENTING TRAINING ACTIVITIES ►

Delegation is key to any organization — but can your learning platform support it? With Fire Engineering Training, the St. Louis Fire Department **CUSTOMIZES PERMISSIONS TO ASSIGN, REVIEW, AND APPROVE TRAINING**, empowering leaders to **MANAGE IT EFFICIENTLY AND ACCURATELY**.

*“Fire Engineering Training is **THE FIRST PLATFORM WE’VE USED THAT OFFERS THE CONFIGURABILITY WE NEED** to ensure accurate tracking of daily activities. Its customizable class lists, flexible user controls, and auditable approval workflow have **SIGNIFICANTLY IMPROVED OUR DATA ACCURACY**.”*

- Captain David Neighbors, St. Louis (MO) Fire Department

BETTER PERMISSIONS LEAD TO **BETTER DATA** ►

Assigning different access levels will allow you to control who logs and verifies training, maintaining clear, trustworthy records, ensuring:

DO IT ALL IN THE MOBILE APP

Conveniently log your training right when activity happens. You no longer need to wait to get back to the station.

AUDIT READY

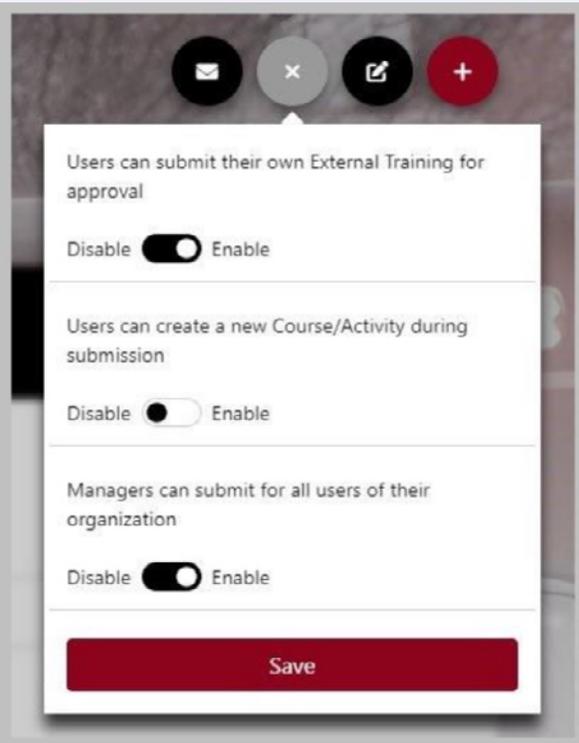

Create or use pre-built templates, tag with ISO or department-specific codes, and upload any necessary documentation.

EFFICIENCY

Empower trusted personnel to monitor completions and keep personnel accountable.

DELEGATE ACCESS TO DISTRIBUTE TASKS ▶

WHO SHOULD ENTER TRAINING?

Should all end users or only middle managers log training?

WHAT ACTIVITIES CAN BE ENTERED?

Should personnel be able to freely create activities or should they pick from a drop-down menu?

WHO SHOULD APPROVE TRAINING?

What levels of management should approve training activities, or have automatic approval?

With a permissions-based approach, St. Louis optimized their training management for 800 personnel at 30 stations (across 6 Districts). Now, they're more ready than ever to tackle their 100K+ annual calls!
